

Professional Development Training

Project Excellence™

Project Excellence takes traditional project management training to a higher level of performance. It adds the human factors of teamwork and leadership that are essential for the successful implementation of any complex project. Project Excellence teaches project leaders and team members how to skillfully lead the project forward and manage the team dynamics.

Workshop Description

Project Excellence has five core modules, but it has the flexibility to allow for customizing to address the specific client situation and project needs.

Basic Modules:

Project Management Tools and Techniques

- The five stages of project management

Project Leadership Skills

- How to guide the project through its stages

Better Together Skills

- Maximizing teamwork and communication skills

Problem Management Skills

- Prevention of, intervention in, and solving project problems

Project Coaching

- Individual and group coaching of the project team

In customizing Project Excellence, the program can incorporate a live project (project simulation) or review a past project as a learning experience.

The program also includes the Adaptive Index™ assessment tool that provides a comprehensive analysis of the participants' project management, leadership and team-working styles. An understanding of these behavior patterns helps individuals adapt their behavior to maximize performance of the project team.

Project Excellence™ has wide application, and programs can be designed for:

Six Sigma Black and Green Belts, Engineers and Construction Managers, IT Professionals, Product and Business Development Managers.

Project Excellence will enhance your existing project management tools and will help produce more on-time and within-budget projects.

Who Should Attend

Project Managers
Team Members
Stake Holders
Project Sponsors
Individual Contributors

Workshop Length

2-5 days

Workshop Materials

Workshop Manual
Adaptive Index™ Report

The Challenge:

Do your project managers know how to plan, organize and schedule projects of any kind or size?

Do they possess the critical communications and people skills necessary for project success?

PDG Project Excellence™ training has provided thousands of professionals with the skills and confidence to motivate individual and team performance, resolve problems and conflicts, and deliver projects on time and within budget.
